

ISO CERTIFIED

**COLLEGE OF INFORMATION TECHNOLOGY**  
**CC106**  
**(Application Development and Emerging Technologies)**

**ASSESSMENT 1**

1. Develop a web app using HTML5, CSS3 or JavaScript, it must cover the following:
  - a. Software Development model used [Discussed clearly each phase/component of the model as applied to the web app you are developing]
  - b. Demonstrate the developed web app.
2. Video yourself while performing the assessment. Record your face and screen using any digital recording of a computer screen online (such as; Screencast) (duration of 5 minutes or more)
3. Filename must be:  
Year & Section\_Surname\_FirstName\_Assessment1  
**(Ex: 2B\_Taupa\_Gilda\_Assessment1)**
4. For your guidance, please refer to the rating rubrics below.

**Note:** Upload your file [both the web app and video] to google drive and provide the link in your submission here. So, the instructor will be redirected to your submission online.

If you are going to share your file on google drive, don't forget to change the setting of the link (change it to *anyone with the link*) as shown below;

RUBRICS FOR GRADING

| Program (50 pts)  | (Excellent)                                                        | (Good)                                                                                  | (Fair)                                                                                      | (Poor)                                  |
|-------------------|--------------------------------------------------------------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|-----------------------------------------|
| Program execution | Program executes correctly with no syntax or runtime errors (9-10) |                                                                                         | Program executes with a minor (easily fixed error) (2-3)                                    | Program does not execute (0-1)          |
| Correct output    | Program displays correct output with no errors (9-10)              | Output has minor errors (6-8)                                                           | Output has multiple errors (3-5)                                                            | Output is incorrect (0-2)               |
| Design of output  | Program displays more than expected (7-8)                          | Program displays minimally expected output (5-6)                                        | Program does not display the required output (3-4)                                          | Output is poorly designed (0-2)         |
|                   |                                                                    |                                                                                         |                                                                                             |                                         |
| Design of logic   | Program is logically well designed (9-10)                          | Program has slight logic errors that do no significantly affect the results (6-8)       | Program has significant logic errors (3-5)                                                  | Program is incorrect (0-2)              |
| Standards         | Program is stylistically well designed (6-7)                       | Few inappropriate design choices (i.e. poor variable names, improper indentation) (4-5) | Several inappropriate design choices (i.e. poor variable names, improper indentation) (2-3) | Program is poorly written (0-1)         |
| Documentation     | Program is well documented (5)                                     | Missing one required comment (4)                                                        | Missing two or more required comments (2-3)                                                 | Most or all documentation missing (0-1) |
