Executed via Windows PowerShell

```
Windows PowerShell
PS C:\Users\Public> javac Calculator.java
PS C:\Users\Public> java Calculator

  BASIC <---> CALCULATOR
This is for basic operations like Addition, Subtraction,
Multiplication and Division only.

    First Number: 12
    Second Number: 12

-----

    [1] Addition
    [2] Subtraction
    [3] Multiplication
    [4] Division
    [5] Modulus

-----

    Choose an Operator: 1
```

```
Windows PowerShell

-----

    90 + 10 = 100

-----

    COMPUTE ANOTHER? [Y/N]: Y
```

If the user chooses Y the program will run again.

```
Windows PowerShell

  BASIC <---> CALCULATOR
This is for basic operations like Addition, Subtraction,
Multiplication and Division only.

    First Number: 15
    Second Number: 2

-----

    [1] Addition
    [2] Subtraction
    [3] Multiplication
    [4] Division
    [5] Modulus

-----

    Choose an Operator: 4
```

```
Windows PowerShell

-----

    15 ÷ 2 = 7.5

-----
